

Airán Sánchez

SOFTWARE DEVELOPER

Software developer experienced in data, web product, backend, infrastructure, and internal tools. I focus on turning complex problems into maintainable systems that teams can understand and evolve.

Capabilities

Web product

React · Next.js · Astro · TypeScript ·
JavaScript · CSS

Backend & systems

C# · .NET · Node.js · PostgreSQL ·
MQTT

Data & automation

Python · Pandas · Pytest · ETL · AWS

Delivery & platform

Docker · Kubernetes · ArgoCD ·
Jenkins · GitHub Actions

Practices

TDD · Testing · Pairing · Clean
Architecture · Mentoring

Experience

LeanMind - TechnyFarma

May 2026 - Present

Full Stack Developer

I collaborate as a full-stack developer on a project for TechnyFarma, working with C#, PostgreSQL, JavaScript, MQTT, and CSS in the context of pharmacy ERP integrations.

C# · .NET · PostgreSQL · JavaScript · MQTT · Pharmacy ERP · CSS3

LeanMind

Jan 2026 - Apr 2026

Internal Management

Leading internal initiatives, mentoring team members, and contributing to company growth strategies. Strongly focused on the use of AI tools and on sharing knowledge, improving processes, and fostering a collaborative engineering culture.

Astro · CSS3 · Docker · Figma · Git · GitHub · Html5 · JavaScript

LeanMind - Voxel

Nov 2024 - Dec 2025

Backend Developer

I participated in the development of a greenfield project for invoice management between hotels and travel agencies. I implemented improvements in different processes for various internal-use projects and, above all, helped with the renewal of a large legacy codebase.

Dotnet · Bash · CSS3 · Html5 · Git · Figma · GitHub · JavaScript

Experience

LeanMind - Secret Project

Oct 2023 - Mar 2024

Full Stack Developer

I collaborated on software projects focused on mathematical research. I contributed to a cutting-edge technology initiative, focusing on clean architecture and maintainable code practices.

Docker · TypeScript · Node.js · MongoDB · ArgoCD · AWS · Bash · CSS3

LeanMind - ClarityAI

Jun 2021 - Sep 2023

Data Engineer

I developed and maintained ETL data processing pipelines for data analysis. I worked with large-scale data systems, implemented automated testing strategies, and contributed to platform scalability improvements.

Python · Pytest · Pandas · MongoDB · Docker · JavaScript · Jupyter Notebooks · AWS

LeanMind

Jun 2020 - Jun 2021

Internship

I started my professional career as an intern, learning software development best practices, reading books, learning TDD methodology and agile principles. I contributed to internal projects while developing fundamental skills in modern web development.

TypeScript · JavaScript · Git · Docker · MySQL · React · HTML5 · CSS3

Education

Web application development

Technical training in web development and programming fundamentals.

Full Stack Bootcamp

Intensive end-to-end web product development training.

Talk

Software Crafters Barcelona · 2023

Fantastic data and where to find it

A talk about data roles, sustainable code, and ETL with Python, Pandas, Dask, and Airflow.
